EXPERIENCE

Penetration Tester
Fiverr

PROFILE

As a Cyber Security Analyst with a passion for Penetration Testing, I bring a solid foundation in programming languages such as C++, Java, and JavaScript, along with knowledge of web development, databases, and operating systems. My hands-on experience gained through internships with industry leaders SAP, Mastercard, and PwC have provided me with valuable skills in performing cybersecurity assessments, identifying vulnerabilities, and recommending mitigation strategies. I have a proven ability to manage complex projects, tasks, and priorities effectively, and I am committed to adhering to industry standards and regulations in cybersecurity.

VIRTUAL EXPERIENCE

Cyber Security Engineer

SAP

- During my virtual internship with SAP, I gained hands-on experience in performing cybersecurity assessments and penetration testing of SAP systems. I worked with a team of experienced professionals to identify vulnerabilities and recommend mitigation strategies. I also learned about the importance of adhering to industry standards and regulations in cybersecurity.

Cyber Security Program

Mastercard

- During my virtual internship with Mastercard's Cybersecurity Program, I gained practical experience in various aspects of cybersecurity such as threat intelligence, vulnerability management, and incident response. I worked with a team of cybersecurity professionals to identify and mitigate potential risks to the organization. I also gained exposure to cybersecurity tools and technologies used by industry professionals

Cyber Security Virtual Case

PwC

- During my virtual internship with PwC, I gained valuable experience in various aspects of cybersecurity consulting, including risk assessments, security strategy development, and regulatory compliance. I worked with a team of experienced professionals to assist clients in identifying and mitigating cybersecurity risks. I also gained exposure to the latest cybersecurity technologies and trends
